METALS

HOME WISH

studio

It was thinking about the beauty of timelessness that the HW METAL line was born. Simple and clean lines dictate the design of pieces such as the Theodora Teapot, the Bar Tray and the Honeycomb holder. The minimalist style, combined with the durability of silver, makes the pieces a true investment. These are objects that will last a lifetime and will undoubtedly be passed down through generations.

Despite silver being the protagonist of the collection, natural stones are also prevalent. The ball vase, for example, has a spherical detail that gives the object even more bossa and appears both in crystal and in rose quartz. The paper holder carries a beautiful agate on its handle, with a metallic coating on the sides.

The silver line is a bold undertaking by Home Wish, which is on its way to consolidating itself as one of the great decor brands in Brazil and will soon gain recognition around the world. **It is perfect for those who like to combine charm, elegance, and sophistication at the table.**
