GEODES

HOME WISH

studio

In an effort to offer our clients pieces that are unique and authentic, Home Wish branched out and decided to combine forces with other names in the design and art world. In order for those collaborations to bloom, we believe that our brand and the guest designer need to have synergy, but also the ability to think outside the box, be bold and create something new.

Our Geode collection was born that way. We partnered with Brunno Jahara, head of Jahara Studio, to create pieces made of brass that were envisioned to adorn and also bring light to spaces. The modern and fluid lines of the objects were combined with crystals to give them a touch of HW DNA.
